

Metal Badges

Metal badges will be worn with pride as they offer a look of class and professionalism. We start with finished brass or aluminum and cut it to the needed size. The logo will be printed in full color and completed by adding personalization. All metal badges have round corners and include a jeweler's pin. Additional options include a magnetic attachment and frames. To extend the life of your metal badges we recommend polyurethane doming.

Remember to account for your future needs and utilize our Premier Online Badge Release Program at badgewarehouse.com. Look to the catalog or website for additional information about this program.
