

Any product at your fingertips! Beacon delivers for you.

Beacon.* World Imports

Beacon will source and handle your custom orders and all the shipping logistics so that you can focus on ideas and sales. Our long-standing relationships with overseas vendors enable us to provide quality products at the right price – from a stock item in a large quantity or a different color, to modifying an existing item to meet a price point or a custom item in one of our current categories.

Import quotes are generally turned around in 24-48 hours. We work with carefully-screened factories to meet our high standard of quality, order implementation and delivery. Beacon does FREE lead testing on all custom and stock products prior to the full production run. So rest assured your product will be safe and secure.
