

PERSONALIZING LEATHER

Leather is a unique material, unlike many of the other promotional products available. But it can still be imprinted and personalized in a very professional upscale way. Leather is a great business gift, service award, performance incentive or recognition award. Leather will stand the test of time and a personalized piece makes it special. It gives the message “this was made just for me”.

Can leather items be personalized?

Answer: We have two personalization (individual names) options available with an additional charge. A personalized gift creates a lasting impression.

Laser etching personalization is available in a quantity of one. The silver or gold underlay shows through the black plate and is adhered to the metal backer. Names should be supplied on a spreadsheet.

Debossed personalization is available with a minimum order of 10 pieces. Most products can be personalized with three initials. Full names are not available. We offer two font styles, Monotype Corsiva in 3/4” size or Century in 3/8” size, for you to select from.

SHOWN TO SIZE 3/8”

Can you print directly on the leather?

Answer: No – only a debossed imprint is available directly on our leather. We can however, print in four color on a domed medallion or with the metal backers. A domed medallion is only available on the new Urban Edge by Canyon line.
