

## THERE'S MORE TO A TABLE COVERS THAN YOU THINK!

Take a look around. You'll see table covers used in many different places: tradeshow, health fairs, job fairs, college orientation, 5K walks/runs, college recruitment, home shows, open houses, grand openings, holiday parties, seminar registration tables, just to name a few! Why? Because a table cover is the perfect place to display your corporate logo, school mascot or association name. The large imprint area gives you lots of room to get your message out and make a positive first impression. Table covers are available in numerous sizes and can be customized to fit special table sizes.

### Can you walk me through the measurements?

**Answer:** Standard table sizes are 29" high and 30" deep across the top of the table. The length of a table will vary in 2' increments like 4', 6' or 8' length tables. Table covers will reach down to just above the floor on the front of the table and across the top of the table plus down the two short sides of the table, again to just above the floor. A three sided table cover will leave the back exposed while the four-sided will have a piece of material that covers the back of the table. Please see the picture on the next page.

### What size table cover should I order?

**Answer:** The key consideration here is whether to go with a flat or fitted table cover. If you are going to use the same size table every time you use the table cover then the fitted style will work. If you expect variation in the size of tables you use (e.g. sometimes a 6' and sometimes an 8' table) then order different sized table covers, a longer flat one or a convertible.
