

ANY PRODUCT AT YOUR FINGERTIPS! BEACON DELIVERS TO YOU.

Beacon will source, buy, handle customs, duties and all the shipping logistics so you can focus on ideas and sales. Our long-standing relationships with overseas vendors enables us to provide quality products at the right price – from stock items in a different color or large quantities, to modifying an existing item to meet a price point or a complete unique custom item in one of our current categories.

We work with carefully screened factories to meet our high standard of quality, order implementation and delivery. Beacon does FREE lead testing on all custom and stock products prior to the full production run.

What is Beacon World Imports?

Answer: It is a program in place where you can buy items that are not in our catalog or large quantities of our stock items, sourced from overseas.

How many years of experience and what kind of relationships do you have with the factories?

Answer: Over 20 years. Our VP of procurement lived in China for several years. During that time he built up relationships with many of the factories. We are currently buying from 7 different countries. We visit the factories several times a year to make sure they meet our quality standards, are made in a socially responsible facility and will meet the delivery date requested.

What can be sourced through Beacon World Imports?

Answer: We have quoted stock items in large quantities, stock items in a special PMS color, a stock item with a slight modification to reduce costs, complete custom items in our current categories.
